

Issue #16389:

“Size” ignored if placed before fontproperties

Branch with fix: https://github.com/RiazCharania/matplotlib/tree/issue_16389

Acceptance testing:

1. Install the branch with the bug fixed
 - `pip install -e`
`git+git://github.com/RiazCharania/matplotlib.git@issue_16389#egg=matplotlib`
2. Download file “Issue_16389_Acceptance_Test.py”, and run it using:
`python Issue_16389_Acceptance_Test.py`
3. Verify the following (Figures provided on page 2):
 - Figure Larger has x & y labels of a larger font size then in figure Default, as a means of showing that “Size” is no longer ignored if placed before “fontproperties”
 - The font stylings of the x & y labels are different from the ones in figure Default, as a way of showing that “fontproperties” is still set correctly

System testing:

All system tests pass; a successful build.
